Context Analysis

In May 2020, the rise in COVID-19 transmissions in host and camp communities, coupled with Cyclone Amphan and the rescue of about 300 displaced people from Rakhine, from the Bay of Bengal and who were then taken to Bhasan Char, were the one of the concerns of humanitarian organizations. UN agencies, non-governmental organisations (NGOs) and the Bangladesh Red Crescent Society (BDRCS) with the International Federation of Red Cross and Red Crescent Societies (IFRC) and Partner National Societies, have been collaborating with government counterparts in Cox’s Bazar district to intensify the preparedness and response actions on COVID-19 as well as Cyclone Amphan, and the effects of the emerging monsoon season. On 14 May, the camp settlement saw the first person testing positive for COVID-19. Up to 21 June, 2,053 people tested positive in Cox’s Bazar district, with a total of 45 cases recorded so far in the camp communities, and 56 cases recorded in host communities, only on 21 June, according to the Civil Surgeon Office. Amid the outbreak, Cyclone Amphan made landfall in Cox’s Bazar on 20 May, with a speed of 140 to 160 km per hour, causing damage to shelters and livelihoods in host and camp communities.

PMO Integrated Preparedness and Response to COVID-19 (up to 18 June)

The number of COVID-19 cases in Bangladesh crossed the 100,000 mark on 18 June, triggering an extension of recent zoning arrangements and existing restrictions across the country to 30 June 2020. This comes at the same time as heavy rains batter Cox’s Bazar, causing some flooding in the camps. Alongside government and UN initiatives to increase the number of isolation and treatment centres and the testing capacity of the only laboratory in the district, BDRCS with support from IFRC, Qatar Red Crescent, Swiss Red Cross, and Swedish Red Cross, is constructing two Integrated Isolation and Treatment Centres (IITCs) for COVID-19 with a capacity of 80 beds in total, located in camps 7 (50 beds) and 2E (30 beds) – the facility in Camp 2E began operations recently, while the other IITC is scheduled to be launched on 28 June.

The Cyclone Preparedness Programme (CPP) and BDRCS, with support from IFRC and American Red Cross, continue to address the dual threats of monsoon-associated hazards and the spread of COVID-19. The camp volunteers have been engaged with ISCG, UNHCR, IOM and Site Management Support agencies to complete small-scale mitigation actions after Cyclone Amphan and heavy rainfall in different camp blocks. As part of continuous efforts for monsoon preparedness and response, disaster readiness-related Personal Protection Gear has been replenished. 3,838 volunteers including 3,400 CPP camp volunteers have been mobilised for dissemination of COVID-19 key message and handwashing demonstration in all 34 camps. 254,000 IEC materials were produced and distributed, while 80,180 sets of personal protective equipment (PPE) was provided to BDRCS frontline staff and community volunteers.

Population Movement Operation (PMO)

The Population Movement Operation (PMO) is run by the Bangladesh Red Crescent Society (BDRCS) with the support of IFRC and 10 Partner National Societies (PNS), to meet the needs of targeted displaced people from Rakhine in Myanmar, and host communities. In May, a total of 359 staff and delegates supported the operation. This includes
337 national staff, out of whom 213 are from BDRCS. The total number of personnel also includes 22 delegates (expatriates) from IFRC and Partner National Societies. The following PNS, through multilateral support via the IFRC Emergency Plan of Action (EPoA), as well as bilateral arrangements, continue to support BDRCS to implement the operation:

### Health and PSS (Psychosocial Support)

In May, 8,749 people in camps and host communities were provided with healthcare services through 11 Red Cross Red Crescent (RCRC)-supported health facilities of BDRCS, while 9,494 people were served in April.

The BDRCS Field Hospital in Camp 7 treated 1,653 patients, while six Health Posts (HP) in camps 5, 8E, 8W, 12, 19 and 22 (supported by the Canadian Red Cross, Japanese Red Cross, Qatar Red Crescent and Turkish Red Crescent) treated 3,400 patients, and four Primary Health Care (PHC) centres (supported by the Swiss Red Cross and Turkish Red Crescent) treated 3,696 patients.

### BDRCS Field Hospital

During the reporting month, the major clinical services provided by the BDRCS Field Hospital were from the out-patient department (OPD), pathology, antenatal care (ANC) and different in-patient units. In the midst of the COVID-19 outbreak and strict containment measures imposed by the government, the patient flow was relatively low.

### People reached through healthcare services from Field Hospital in May 2020

Health Posts (HPs)
Six Health Posts (HPs) in different camp locations (see chart) treated a total of 3,400 people in May, with a 28 per cent decline in patient flow from April (4,721). Each HP treated an average of 22 patients per day. Most health service seekers were from Camp 12 (supported by the Japanese Red Cross) and Camp 19 (supported by the Qatar Red Crescent). In addition to the centre-based services, these facilities continued community-based health outreach, making door-to-door visits in the catchment camp areas to educate the households on various health topics such as COVID-19 prevention and control.

![A doctor consults with a patient at a health post in Camp 12 (Photo: BDRCS)](image)

Primary Healthcare Centres (PHC)
Four PHCs operating on a 24-hour basis (supported by the Swiss Red Cross in camps 11, 13, 15 and the Turkish Red Crescent in Camp 20 Ext), treated 3,696 patients in May, which was a 3 per cent increase from April (3,592). Each PHC treated an average of 30 patients per day. Major services provided were OPD, PSS, ANC, PNC, nutrition, deliveries etc.

![Community mobilisation chart](image)

Community-Based Health & First Aid (CBHFA)
Under the CBHFA outreach programme, BDRCS continues to conduct community mobilisations using CBHFA approaches through six health posts, deploying 150 community health volunteers (CHVs). During the reporting month, 8 camps (see graph) were covered with CBHFA interventions, reaching a total of 4,965 people through 553 sessions. A total of 10,169 households were also visited for the purposes of disseminating key messages focused on handwashing and social distancing to help prevent the transmission of COVID-19.
Psychosocial Support (PSS)

During the reporting month, BDRCS provided PSS assistance to distressed people, to address their psychological and social needs in the COVID-19 outbreak. This was done with the support of IFRC, the Danish Red Cross, Japanese Red Cross and Turkish Red Crescent in camps 13, 14, 17 and 19. The aim of this support is to reduce the augmented stress and levels of anxiety resulting from this outbreak, and to assist people to cope with the situation and help to improve their immune systems through mental wellbeing. The PSS team comprises three officers, four community mobilisers and 45 community volunteers. A total of 1,666 people were provided with different types of PSS support including training on Psychosocial First Aid (PFA), integrated community-based support with risk communication, remote PFA, and other COVID-19 related PSS or PFA support (see table).

BANGLADESH: Population Movement Operation
31 May 2020
Community volunteers make their rounds within the camp every day. (Photo IFRC)

855,000 people estimated to have crossed into Bangladesh
260,000 people reached with Red Cross/Red Crescent intervention
25,591 No. of women provided with menstrual hygiene management kits
493,955 patient consultations in 10 Red Cross Red Crescent health facilities & 1 BDRCS field hospital
222,126 people reached with psychosocial support activities

269,820 food parcels distributed
32,532 households provided with upgrade shelter kits
49,750 households received solar lanterns
5,110 households received liquid petroleum gas (LPG)
13,266 households provided with unconditional cash support

6,631 households provided with Transitional shelter assistance (TSA)
168,178 people reached through hygiene promotion
133,469 households received blankets
160.28 M liters of safe water distributed to 61,711 family
225,909 households received hygiene kits

45,308 dignity kits distributed
154 borehole constructed
946 latrines constructed
267 bathing facilities constructed
68,508 households received jerry cans

1 Source: ISCG Joint Response Plan for 2019
Reporting Period: 25 Aug 2017 to 31 May 2020

BDRCS, American RC and IFRC are working in all 34 camps in Ukhiya and Teknaf to train community Volunteers (KPAU) via the Cambodian Protection Programme (CPP). (IFRC also support CPP in Teknaf).

Indicates the presence of IFRC in Camp.

The map should not imply endorsement of any person or the views expressed by any organization or the data or views expressed in the map or site.
Distribution

In May, COVID-19 related restrictions on mass gatherings for the distribution of non-essential items continued to be in place, and as such, only Ramadan food parcels and hygiene top-up kits were allowed to be distributed. A total of 9,619 households received 11,311 food parcels in camps 12 and 17, supported by the Qatar Red Crescent and Turkish Red Crescent. People from camps 13, 18 and 19 were provided with hygiene top-up kits, with support from IFRC and the German Red Cross to meet their daily needs to maintain personal hygiene and engage in frequent hand washing to help prevent the transmission of COVID-19.

Shelter - Support for Construction

In May, the BDRCS shelter team conducted a number of construction activities to support other sectors’ facilities in different camps which are supported by IFRC, the Swiss Red Cross, Qatar Red Crescent and Danish Red Cross. Most of the planned shelter activities continue to be on hold and will be rescheduled in view of government-imposed restrictions on shelter activities in the camp and host communities to contain the spread of COVID-19. The following table contains details of different construction work supported by the team:

<table>

Water, Sanitation and Hygiene (WASH)

During the reporting month, BDRCS with support from IFRC, the German Red Cross, Swedish Red Cross and Swiss Red Cross, continued implementation on a limited scale due to the restriction of public movement and other non-essential activities in the camps. Major accomplishments under the different components of WASH during the month are stated below.

### Water Supply and System

<table>

Solid Waste Management (SWM)

In May, 29 volunteers of Camp 15 continued solid waste management for 2,200 households with support from the Swiss Red Cross, following the procedures below:

1. Waste collection
2. Waste segregation including segregation at source
3. Waste transportation
4. Compost processing
5. Selling valuable waste to waste traders
6. Capacity building training for Community Volunteers on SWM

Types of waste collection (kg) in May 2020

Protection, Gender and Inclusion (PGI)

BDRCS, with support from IFRC, implements PGI activities in camps 13, 14 and 19. PGI-related activities are also conducted in Camp 17, with the support of the Turkish Red Crescent. Recent activities include the distribution of dignity kits, training for PGI, PSS and CEA community volunteers, and conducting a webinar on PGI mainstreaming with PMO staff. Details of activities are as follow:

<table>
<thead>
<tr>
<th>PGI Accomplishments</th>

</tr>
</tbody>
</table>
PGI Challenges
The major challenge continuing for the PGI team in May is that protection programming has been currently deemed non-essential by the authorities and therefore, the usual protection-based activities delivered through three Dignity, Access, Participation and Safety (DAPS) centres, are on hold. As such, the team has focused its attention on training other sectors (including health, CEA and PSS) community volunteers on PGI as they are playing such an important role in responding to the pandemic. Another challenge is that reports of SGBV (and individual referrals for such issues) continue to rise. The PGI team has therefore focused on conducting training for community volunteers and mainstreaming efforts on understanding, preventing and responding to these issues.

Disaster Risk Reduction (DRR)

The outbreak of COVID-19 and the threat of the current cyclone season in camps and host communities compound each other. The Coastal Disaster Risk Reduction (CDRR) programme of the Bangladesh Red Crescent Society (BDRCS) repurposed and continued its intervention in all 34 camps and host communities to support concurrent COVID-19 preparedness and response initiatives in May 2020. The Cyclone Preparedness Programme (CPP) and BDRCS with support from IFRC and the American Red Cross, continue to address the threat of cyclones and the spread of COVID-19.

Major accomplishments of the month
The CPP and BDRCS, with support from IFRC/American Red Cross and the Site Management and Site Development (SMSD) sector, conducted a number of orientations, consultations, meetings and special exercises to build the capacity of CPP camp volunteers and other groups, as stated below:

- 225 CPP camp volunteers were oriented on critical handwashing and COVID-19 key messages by participating in COVID-19 related sessions.
- 27 religious leaders became knowledgeable on COVID-19 awareness messages.
- 48,132 camp people were aware of COVID-19 awareness and handwashing messages, as CPP camp volunteers conducted Inter-Personal Communication (IPC) sessions and micro-group awareness meetings.

1 The Cyclone Preparedness Programme (CPP) is a unique institutional arrangement for community preparedness created to mitigate the challenges of catastrophic cyclones that frequently hit the Bangladesh coast (including Cox’s Bazar). The CPP is a joint programme of the Government of Bangladesh and the Bangladesh Red Crescent Society that provides a robust preparedness and early warning system for the population of coastal districts including Cox’s Bazar camp communities. In the Cox’s Bazar camp settlement, the CPP early warning system was expanded in 2018 and 3,400 CPP volunteers have been trained and mobilised by BDRCS with support from the American Red Cross and IFRC.
• 1,505 CPP camp volunteers comprising 1,090 males and 415 females in the camps learnt about the cyclone early warning and flag system.
• CPP camp volunteers were mobilised to conduct early warning and early action (EWEA) for Cyclone Amphan in the camp settlements. The EWEA involves the dissemination of warning messages, flag-hoisting and immediate actions, shelter strengthening, collecting damage information, and lowering of flags as per Bangladesh Meteorological Department (BMD) protocols.
• Cyclone Amphan coordination meetings were held at district and sub-district level to plan and respond in a coordinated way in host community intervention areas comprising Ratna Palong and Haldia Palong Union.
• The IFRC/American Red Cross Emergency Response (ER) team provided support to the Emergency Operation Centre (EOC) for Cyclone Amphan and executed activities (i.e. rapid team formation, situation update, communication and collaboration, collecting initial damage information etc) in accordance with cyclone signals issued by the BMD.

Community Engagement & Accountability (CEA)
A total of 11,673 people (6,070 males and 5,603 females) from host and camp communities were reached in May, through CEA activities such as orientation sessions for community volunteers on risk communication, household visits, audio messages on COVID-19 by using hand mikes, religious leaders at mosques, information and feedback through Info Hubs and help desk support. Other sectors were assisted in developing three information, education and communication (IEC) materials on COVID-19 awareness. The activities conducted in camps 5, 11,12,13,14,17,18 and 19 were mainly supported by IFRC CEA standalone interventions and some community engagement supported by the Turkish Red Crescent. accomplishments recorded during the reporting month and priorities in the next months are as follows:

CEA accomplishments in May
• 3,209 camp people have been benefited from COVID-19 awareness message dissemination conducted through household visits
• 6,730 people reached through COVID-19 audio messages delivered via hand mikes
• 119 audio messages on COVID-19 have been disseminated by Imam (religious leaders)
• 3 information, education and communication (IEC) materials on handwashing and COVID-19 stigmatisation were developed
• 1,309 feedback collected from help desk
• 42 feedback collected from info hubs
• 223 audio messages on COVID-19 disseminated at info hubs
• 25 Health community volunteers and 16 PGI community volunteers have been orientated on risk communication

For more information on COVID-19 related feedback, please visit COVID-19 Feedback Dashboard

Priorities in the next month
• Training for community volunteers on community consultation process for the Integrated Isolation and Treatment Centres (IITC)
• CEA orientation for newly-joined staff at the IITC
• Conducting a perception survey jointly with Grand Truth Solution (GTS) on the impact of COVID-19
Communication

During the reporting month, IFRC and BDRCS jointly captured stories and events which are available on social media. These include:

- **A news story** containing quotes from IFRC migration and displacement manager Ezekiel Simperingham on how the world’s largest displacement camp in #CoxsBazar is dealing with the threat of COVID-19.
- During the COVID-19 outbreak, people from the host community in Cox’s Bazar were provided with LPG cylinders and stoves. [See video.](#)
